

# LVD TEST REPORT

Report No.: \$19071704104001

Product: Bluetooth Low Energy (BLE) 5.0 Data Pass-through

Module

HM-BT4502, HM-BT4502B, HM-BT4502C, HM-BT4502D,

Model No.: HM-BT4502E, HM-BT4502F

Applicant: Shenzhen HOPE Microelectronics Co., Ltd.

2/F, Building3, Pingshan Private Enterprise Science and

Address: Technology Park, Xili Town, Nanshan District, Shenzhen,

Guangdong, China

Issued by: Shenzhen NTEK Testing Technology Co., Ltd.

1/F, Building E, Fenda Science Park, Sanwei Community,

Location: Xixiang Street, Bao'an District, Shenzhen 518126 P.R.

China

**Tel:** +86-755-6115 6588 Fax +86-755-6115 6599

This test report consists of **53** pages in total. It may be duplicated completely for legal use with the approval of the applicant. It should not be reproduced except in full, without the written approval of our laboratory. The client should not use it to claim product endorsement by NTEK. The test results in the report only apply to the tested sample. The test report shall be invalid without all the signatures of testing engineers, reviewer and approver. Any objections must be raised to NTEK within 15 days since the date when the report is received. It will not be taken into consideration beyond this limit.

## **TEST REPORT**

### IEC/EN 60950-1

Information technology equipment – Safety –
Part 1: General requirements

Report Number	S19071704104001
Tested by (name + signature):	Keny Fu Coco Li Coco Vr
Approved by (name + signature):	Coco Li
Date of issue:	2019-08-21
Testing Laboratory	Shenzhen NTEK Testing Technology Co., Ltd.
Address:	1/F, Building E, Fenda Science Park, Sanwei Community, Xixiang Street, Bao'an District, Shenzhen 518126 P.R. China
Applicant's name	Shenzhen HOPE Microelectronics Co., Ltd.
Address:	2/F, Building3, Pingshan Private Enterprise Science and Technology Park, Xili Town, Nanshan District, Shenzhen, Guangdong, China
Manufacturer's name	Shenzhen HOPE Microelectronics Co., Ltd.
Address:	2/F, Building3, Pingshan Private Enterprise Science and Technology Park, Xili Town, Nanshan District, Shenzhen, Guangdong, China
Test specification:	
Standard:	☐ IEC 60950-1:2005 (Second Edition) + Am 1:2009 + Am 2:2013 ☐ EN 60950-1:2006 + A11:2009 + A1:2010+A12:2011+A2:2013
Test procedure	CE procedure
Non-standard test method:	N/A
Test Report Form No	IECEN60950_1F
Test Report Form(s) Originator::	SGS Fimko Ltd
Master TRF:	Dated 2014-02
and Components (IECEE System).  This publication may be reproduced in is acknowledged as copyright owner as	onformity Assessment Schemes for Electrotechnical Equipment All rights reserved. Test item description:	Bluetooth Low Energy (BLE) 5.0 Data Pass-through Module
Trade Mark:	HopeRF
Model/Type reference	HM-BT4502, HM-BT4502B, HM-BT4502C, HM-BT4502D, HM-BT4502E, HM-BT4502F
Ratings:	DC3.3V, 10mA

Test item particulars:	4 4 4 4 4 4
Equipment mobility:	[] movable [] hand-held [] transportable [] stationary [X] for building-in [] direct plug-in
Connection to the mains:	[] pluggable equipment [] type A [] type B [] permanent connection [] detachable power supply cord [] non-detachable power supply cord [X] not directly connected to the mains
Operating condition:	[X] continuous [] rated operating / resting time:
Access location:	[X] operator accessible [] restricted access location
Over voltage category (OVC):	[] OVC I [] OVC II [] OVC III [] OVC IV [X] other:
Mains supply tolerance (%) or absolute mains supply values:	N/A P P P P P
Tested for IT power systems	[] Yes [X] No
IT testing, phase-phase voltage (V)	N/A
Class of equipment:	[] Class I [] Class II [X] Class III [] Not classified
Considered current rating of protective device as part of the building installation (A)	N/A
Pollution degree (PD)	[] PD 1 (X] PD 2 [] PD 3
IP protection class:	
Altitude during operation (m)	
Altitude of test laboratory (m)	<500m
Mass of equipment (kg):	<1kg
Possible test case verdicts:	
- test case does not apply to the test object:	N(/A)
- test object does meet the requirement:	P (Pass)
- test object does not meet the requirement:	F (Fail)
Testing	* * * * * * *
Date of receipt of test item:	2019-08-15
Date (s) of performance of tests:	2019-08-15 to 2019-08-19
General remarks:	
The test results presented in this report relate only to the This report shall not be reproduced, except in full, with alaboratory.  "(see Enclosure #)" refers to additional information ap "(see appended table)" refers to a table appended to the	out the written approval of the Issuing testing pended to the report.
Throughout this report a   comma /   point is use	ed as the decimal separator.

#### General product information:

- -The equipment is a Bluetooth Low Energy (BLE) 5.0 Data Pass-through Module supplied by DC 3.3V, therefore, its circuits are considered as SELV of class III equipment.
- -The testing operating ambient temperature to testing sample is considered as 40°C.
- -All models sre the same except model names, and all tests were conducted on model HM-BT4502.

#### Abbreviations used in the report:

Normal conditions
 functional insulation
 double insulation
 between parts of opposite polarity
 N.C.
 single fault conditions
 basic insulation
 supplementary insulation
 reinforced insulation
 RI

Indicate used abbreviations (if any):

#### Copy of marking plate:

W Bluetooth Low Energy (BLE) 5.0 Data

Pass-through Module Model no.: HM-BT4502 Rating: 3.3V===10mA

Clause Requirement + Test Result - Remark Verdict  It is permitted to bridge this insulation with an optocoupler complying with 2.10.5.4 b).  It is permitted to bridge this insulation with a capacitor complying with EN 60384-14:2005, subclass Y2.  A capacitor classified Y3 according to EN 60384-14:2005, may bridge this insulation under the following conditions:  - the insulation requirements are satisfied by having a capacitor classified Y3 as defined by EN 60384-14. which in addition to the Y3 testing, is tested with an impulse test of 2,5 kV defined in EN 60950-1:2006, 6.2.2.1;  - the additional testing shall be performed on all the test specimens as described in EN 60384-14:  - the impulse test of 2,5 kV is to be performed before the endurance test in EN 60384-14;  - the impulse test of 12,5 kV is to be performed before the endurance test in EN 60384-14;  - the impulse test of 12,5 kV is to be performed before the endurance test in EN 60384-14;  - the impulse test of 12,5 kV is to be performed before the endurance test in EN 60384-14;  - the impulse test of 12,5 kV is to be performed before the endurance test in EN 60384-14.  6.1.2.2 In Finland, Norway and Sweden, the exclusions are applicable for PERMANENTLY CONNECTED EQUIPMENT, PLUGGABLE EQUIPMENT TYPE B and equipment intended to be used in a RESTRICTED ACCESS LOCATION where equipotential bonding has been applied, e.g. in a telecommunication centre, and which has provision for a permanently connected PROTECTIVE EARTHING CONDUCTOR and is provided with instructions for the installation of that conductor by a SERVICE PERSON.  7.2 In Finland, Norway and Sweden, for requirements see 6.1.2.1 and 6.1.2.2 of this annex.  The term TELECOMMUNICATION NETWORK in 6.1.2 being replaced by the term CABLE DISTRIBUTION SYSTEM.	ZB ANNEX (normative)  SPECIAL NATIONAL CONDITIONS (EN)							
It is permitted to bridge this insulation with a capacitor complying with EN 60384-14:2005, subclass Y2.  A capacitor classified Y3 according to EN 60384-14:2005, may bridge this insulation under the following conditions:  - the insulation requirements are satisfied by having a capacitor classified Y3 as defined by EN 60384-14, which in addition to the Y3 testing, is tested with an impulse test of 2,5 kV defined in EN 60950-1:2006, 6.2.2.1;  - the additional testing shall be performed on all the test specimens as described in EN 60384-14.  - the impulse test of 2,5 kV is to be performed before the endurance test in EN 60384-14, in the sequence of tests as described in EN 60384-14.  In Finland, Norway and Sweden, the exclusions are applicable for PERMANENTLY CONNECTED EQUIPMENT, PLUGGABLE EQUIPMENT TYPE B and equipment intended to be used in a RESTRICTED ACCESS LOCATION where equipotential bonding has been applied, e.g. in a telecommunication centre, and which has provision for a permanently connected PROTECTIVE EARTHING CONDUCTOR and is provided with instructions for the installation of that conductor by a SERVICE PERSON.  7.2 In Finland, Norway and Sweden, for requirements see 6.1.2.1 and 6.1.2.2 of this annex.  The term TELECOMMUNICATION NETWORK in 6.1.2 being replaced by the term CABLE DISTRIBUTION SYSTEM.	Clause	Requirement + Test	Result - Remark	Verdict				
capacitor complying with EN 60384-14:2005, subclass Y2.  A capacitor classified Y3 according to EN 60384-14:2005, may bridge this insulation under the following conditions:  - the insulation requirements are satisfied by having a capacitor classified Y3 as defined by EN 60384-14, which in addition to the Y3 testing, is tested with an impulse test of 2,5 kV defined in EN 60950-1:2006, 6.2.2.1;  - the additional testing shall be performed on all the test specimens as described in EN 60384-14:  - the impulse test of 2,5 kV is to be performed before the endurance test in EN 60384-14, in the sequence of tests as described in EN 60384-14.  6.1.2.2  In Finland, Norway and Sweden, the exclusions are applicable for PERMANENTLY CONNECTED EQUIPMENT, PLUGGABLE EQUIPMENT TYPE B and equipment intended to be used in a RESTRICTED ACCESS LOCATION where equipotential bonding has been applied, e.g. in a telecommunication centre, and which has provision for a permanently connected PROTECTIVE EARTHING CONDUCTOR and is provided with instructions for the installation of that conductor by a SERVICE PERSON.  7.2  In Finland, Norway and Sweden, for requirements see 6.1.2.1 and 6.1.2.2 of this annex.
